

## Table of contents

<b>Chapter 1: General introduction</b>	<b>1</b>
1.1. A study in second dialect acquisition	1
1.2. Background	2
1.3. Objectives of the present study	4
1.4. The structure of the dissertation	6
<b>Chapter 2: (Second) Dialect Acquisition</b>	<b>8</b>
2.1. Introduction	8
2.2. First dialect acquisition	8
2.3. What is Second Dialect Acquisition?	10
2.4. Second Dialect Acquisition and Second Language Acquisition: a comparison	12
2.4.1. Differences between SDA and SLA	12
2.4.2. Similarities between SDA and SLA	15
2.5. Main issues in second dialect acquisition research	19
2.5.1. Introduction	19
2.5.2. Factors affecting the individual child's degree of success in second dialect acquisition	19
2.5.2.1. Age of first contact	19
2.5.2.1.1. The critical period of language acquisition	20
2.5.2.1.2. The role of age of first contact in second dialect acquisition	22
2.5.2.2. Orientation towards and position in the peer group	25
2.5.2.3. Attitude and motivation	28
2.5.2.4. Conclusion	29
2.5.3. The degree of complexity of dialect features	30
2.5.4. The relationship between the L1 and the L2 and the learning mechanisms underlying second dialect acquisition	35
2.6. Summary	39
<b>Chapter 3: Theoretical framework</b>	<b>42</b>
3.1. Introduction	42
3.2. Rule-based models	43
3.2.1. Basic assumptions of rule-based models	43
3.2.2. Intersystemic correspondences between L1 and L2	45
3.2.3. Two-dimensional models for the analysis of variation between related language varieties	49
3.2.3.1. The theory of Lexical Phonology	50
3.2.3.1.1. Basic principles of Lexical Phonology	50
3.2.3.1.2. Combining Lexical Phonology with Optimality Theory	53
3.2.3.2. Auer's (1993) two-dimensional model	57
3.2.3.3. Taeldeman's (1993) interpretation of the two-dimensional model	61
3.2.3.4. The ontological status of correspondence rules	65

3.2.3.5. Summary	67
3.3. Exemplar-based models	67
3.3.1. Basic assumptions of exemplar-based models	67
3.3.2. Arguing in favour of exemplar-based models	69
3.3.3. Effects of type and token frequency accounted for within exemplar-based theory	75
3.3.3.1. Lexical diffusion	75
3.3.3.2. Bybee's model of the mental representation of the phonology of words	77
3.3.3.3. Accounting for frequency effects in an exemplar-based model	80
3.3.4. Summary	82
3.4. A hybrid model combining rule-based and exemplar-based theory	83
3.5. Overgeneralizations	86
3.6. Summary	90
<b>Chapter 4: Hypotheses on the effects of feature- and speaker-related factors</b>	<b>92</b>
4.1. Introduction	92
4.2. Factors affecting the learnability of dialect features	93
4.2.1. 'Predictability'	94
4.2.2. Number of competing variants	95
4.2.3. Incidence or type frequency	98
4.2.4. Conditioning environment	100
4.2.5. Frequency of usage or token frequency	105
4.2.6. Productivity (cf. postlexical versus lexical features)	107
4.2.7. Geographical distribution	109
4.2.8. Summary	113
4.3. Speaker-related factors	114
4.3.1. Age	115
4.3.2. Gender	116
4.3.3. Attitude and motivation	117
4.3.4. Origin of the mother and father	118
4.3.5. Summary	120
4.4. Hypotheses on overgeneralization	120
4.4.1. Introduction	120
4.4.2. Overgeneralization errors in our data: frequency and types	121
4.4.3. A case study: the "/ɛi/-paradigm"	123
4.4.4. The role of feature-related factors in the production of overgeneralizations	125
4.4.4.1. When do overgeneralizations occur?	125
4.4.4.2. Incidence	127
4.4.4.3. Conditioning environment	128
4.4.4.4. Number of Standard Dutch variants	130
4.4.4.5. Geographical distribution	131

4.4.4.6. Token frequency	131
4.4.4.6.1. Token frequency on the level of the word	132
4.4.4.6.2. Average token frequency per feature	133
4.4.5. Summary	133
4.5. Summary	134
<b>Chapter 5: Methodology</b>	<b>135</b>
5.1. Introduction	135
5.2. Implementation of the feature- and speaker-related factors	135
5.2.1. Implementation of the feature-related factors	135
5.2.1.1. Competing variants	136
5.2.1.2. Incidence or type frequency	138
5.2.1.3. Conditioning environment	142
5.2.1.4. Frequency of usage or token frequency	142
5.2.1.5. Productivity (cf. lexical vs. postlexical status)	145
5.2.1.6. Geographical distribution	146
5.2.2. Implementation of the speaker-related factors	148
5.2.2.1. Attitude	148
5.2.2.2. Classification of the informants according to age, gender, origin of the parents and home language	150
5.3. Informants, questionnaire and recordings	152
5.3.1. Additional criteria for the selection of the informants	152
5.3.2. Questionnaire	152
5.3.3. Recordings	154
5.3.3.1. Recording conditions	154
5.3.3.2. Word list and recording procedure	155
5.3.3.3. Collecting spontaneous speech	156
5.4. Data processing	156
5.4.1. Transcriptions	156
5.4.2. Formant measurements	157
5.4.3. Coding the transcriptions into a computerized database	160
5.4.4. Design of the databases	161
5.4.5. Statistical analyses	165
5.5. Summary	167
<b>Chapter 6: Setting and linguistic variables</b>	<b>168</b>
6.1. Introduction	168
6.2. The research location	168
6.3. Linguistic situation of Maldegem	169
6.3.1. The three language varieties in Flanders	169
6.3.1.1. Functional distribution of the three varieties in Maldegem	169

6.3.1.2. Relationships between the three varieties and the different components of language	171
6.3.2. The Maldegem dialect phonology from a geographical perspective	174
6.3.2.1. Introduction	174
6.3.2.2. Tertiary features of the Maldegem dialect	175
6.3.2.3. Secondary features of the Maldegem dialect	177
6.3.2.4. Primary features of the Maldegem dialect	179
6.4. Phonological variables in the present study	181
6.4.1. Deletion of /l/ and compensatory lengthening of the preceding vowel	182
6.4.2. Deletion of /n/ and compensatory lengthening and nasalization of the preceding vowel	186
6.4.3. Laryngealization of <i>k</i>	188
6.4.4. Deletion of /r/ before an alveolar fricative in monomorphemic words	190
6.4.5. SD /ɛi/ (from Wgm. <i>î</i> ) ~ DIA /e/ before velar or laryngeal consonant	192
6.4.6. SD /ɛi/ (from Wgm. <i>î</i> ) ~ DIA /ø/ before an anterior consonant	196
6.4.7. SD /ɛi/ (from Wgm. <i>ai</i> ) (with former umlaut) ~ DIA /iə/	198
6.4.8. SD /ɛi/ (from Wgm. <i>ai</i> ) (with former umlaut) ~ DIA /æi/	199
6.4.9. SD /ɛi/ (from Wgm. <i>î</i> ) ~ DIA /i/ in <i>tijger</i> and <i>bij</i>	200
6.4.10. SD /œy/ (from Wgm. <i>û</i> ) ~ DIA /ø/	201
6.4.11. SD /œy/ (from Wgm. <i>û</i> ) ~ DIA /i/ in <i>kuiken</i> and <i>ruiken</i>	203
6.4.12. SD /œy/ (from Wgm. <i>û</i> ) ~ DIA /æi/ or DIA /iə/ in <i>spuut</i>	203
6.4.13. SD /o:/ (from Wgm. <i>ũ</i> in open syllable) (without former umlaut) ~ DIA /ø/	203
6.4.14. SD /o:/ (from Wgm. <i>au</i> ) ~ DIA /uə/	205
6.4.15. SD /ʌ/ (from Wgm. <i>ũ</i> with former umlaut) ~ DIA /ɛ̃/	207
6.4.16. SD /ɔ/ (from Wgm. <i>ũ</i> without former umlaut) ~ DIA /ɛ̃/	209
6.4.17. SD /e:/ (from Wgm. <i>ai</i> without former umlaut) ~ DIA /iə/	210
6.4.18. SD /e:/ (from Wgm. <i>ĩ/ ě + r</i> ) ~ DIA /ɛ̃/	212
6.4.19. SD /ɔu/ (from Wgm. <i>ǎ/ǒ + l + t/s</i> ) ~ DIA [ɔi]	213
6.4.20. SD /ɔu/ (from Wgm. <i>ǎ/ǒ + l + d/z/w</i> ) ~ DIA [ɔu]	214
6.4.21. SD /a:/ (from Wgm. <i>ǎ/â</i> in open syllable) ~ DIA /ɔ̃ <sup>o</sup> /	215
6.4.22. SD /a:/ (from Wgm. <i>ǎ + r + alv. C</i> ) ~ DIA /ɔ̃ <sup>o</sup> /	217
6.4.23. SD /a:/ (from Wgm. <i>ǎ + r + alv. C, with former umlaut</i> ) ~ DIA /ɛ̃/	218
6.4.24. SD /a:/ ~ DIA /ɑ/ before <i>-ts</i>	219
6.4.25. SD /ɪ/ (from Wgm. <i>ĩ</i> in a closed syllable) ~ DIA /æ/	220
6.4.26. Lexical exceptions	221
6.4.27. Conclusion	224
6.5. The Maldegem phoneme inventory	224

6.6. Summary	226
<b>Chapter 7: Results</b>	<b>227</b>
7.1. Introduction	227
7.2. Success rate with respect to dialect knowledge/acquisition	227
7.2.1. Dialect knowledge: native dialect speakers vs. second dialect learners	227
7.2.2. Effects of feature-related factors on dialect knowledge	235
7.2.2.1. Effects of incidence	236
7.2.2.2. Effects of the number of competing variants	241
7.2.2.2.1. Effects of the number of competing dialect variants	241
7.2.2.2.2. Effects of the number of competing Standard Dutch variants	241
7.2.2.3. Effects of conditioning environment	243
7.2.2.4. Effects of token frequency	245
7.2.2.4.1. Effects of token frequency at the level of the word	246
7.2.2.4.2. Effects of average token frequency per feature	247
7.2.2.5. Effects of productivity	248
7.2.2.6. Effects of geographical distribution	250
7.2.2.7. Interaction effects between the factors contributing to the degree of predictability	252
7.2.2.7.1. Conditioning environment*n dialect variants*home language	255
7.2.2.7.2. n dialect variants*n SD variants*home language	256
7.2.2.7.3. Conditioning environment*n SD variants*home language	258
7.2.2.7.4. Conditioning environment*n dialect variants*incidence	259
7.2.2.7.5. Conditioning environment*n SD variants*incidence	261
7.2.2.7.6. Conditioning environment*n dialect variants*n SD variants	262
7.2.2.7.7. Average token frequency*n dialect variants*home language	263
7.2.2.7.8. Productivity*n SD variants*home language	265
7.2.2.7.9. Average token frequency*conditioning environment*home language	265
7.2.2.8. Which feature-related factor is the best predictor of success in dialect proficiency?	268
7.2.3. Effects of speaker-related factors on the individual degree of dialect knowledge/acquisition	273
7.2.3.1. Effects of age	273
7.2.3.2. Effects of gender	275
7.2.3.3. Effects of attitudinal factors	277
7.2.3.4. Effects of origin of the parents	279
7.2.3.5. Which speaker-related factor is the best predictor of the degree of dialect proficiency?	281
7.3. Degree of overgeneralization	284
7.3.1. Degree of overgeneralization: native dialect speakers vs. second dialect learners	284
7.3.2. Role of feature-related factors in the process of overgeneralization	288

7.3.2.1. Introduction	288
7.3.2.2. Effects of incidence	289
7.3.2.3. Effects of conditioning environment	291
7.3.2.4. Effects of number of Standard Dutch variants	295
7.3.2.5. Effects of geographical distribution	296
7.3.2.6. Effects of token frequency	298
7.3.2.6.1. Token frequency at the level of the word	298
7.3.2.6.2. Average token frequency per feature	298
7.3.2.7. Which factor is the best predictor of the degree of overgeneralization?	300
7.3.3. Role of speaker-related factors in the process of overgeneralization	303
7.4. Summary	305
<b>Chapter 8: Discussion</b>	<b>309</b>
8.1. Introduction	309
8.2. Discussing the effects of feature-related factors on the degree of dialect knowledge/acquisition	309
8.2.1. Accounting for the effects of incidence	309
8.2.2. Accounting for the effects of competing variants	310
8.2.2.1. Accounting for the effects of the number of competing dialect variants	312
8.2.2.2. Accounting for the effects of the number of competing Standard Dutch variants	312
8.2.3. Accounting for the effects of conditioning environment	314
8.2.4. Accounting for the effects of token frequency	317
8.2.4.1. Token frequency at the level of the word	317
8.2.4.2. Average token frequency per feature	319
8.2.5. Accounting for the effects of productivity	320
8.2.6. Accounting for the effects of geographical distribution	321
8.2.7. Interactions between factors determining predictability	323
8.2.7.1. Possible accounts of the three-way interactions between the factors determining predictability	324
8.2.7.2. Average token frequency*conditioning environment*home language	328
8.2.8. Summary	329
8.3. Discussing the effects of speaker-related factors on the individual success of (second) dialect acquisition	330
8.3.1. Accounting for the effects of age	330
8.3.2. Accounting for the effects of gender	331
8.3.3. Accounting for the effects of attitude/motivation	332
8.3.4. Accounting for the effects of origin of the parents	333
8.3.5. Summary	335
8.4. Discussing the effects of feature-related factors on the production of overgeneralizations	336
8.4.1. Introduction	336
8.4.2. Accounting for the effects of incidence	337

8.4.3. Accounting for the effects of conditioning environment	338
8.4.4. Number of competing Standard Dutch variants	340
8.4.5. Accounting for the effects of geographical distribution	341
8.4.6. Accounting for the effects of token frequency	342
8.4.6.1. Token frequency at the level of the word	342
8.4.6.2. Average token frequency per feature	343
8.4.7. Summary	343
8.5. Summary and conclusion	345
<b>Chapter 9: Conclusions and suggestions for future research</b>	<b>347</b>
9.1. Conclusions regarding the theoretical background	347
9.1.1. Conclusions regarding the literature on second dialect acquisition	347
9.1.2. Conclusions with respect to acquisition theory	348
9.2. Conclusions of our study on the acquisition of the Maldegem dialect as a second language	349
9.3. Suggestions for future research	355
<b>Bibliography</b>	<b>357</b>
<b>Appendices</b>	<b>371</b>
Appendix 1: Operationalization of incidence and average token frequency (Unanimity List; Spoken Dutch Corpus)	371
Appendix 2: Operationalization of incidence on the basis of Taeldeman's List	386
Appendix 3: Token frequency of the words on the word list according to the Spoken Dutch Corpus	400
Appendix 4: Implementation of geographical distribution (source: FAND)	403
Appendix 5: Questionnaire	406
Appendix 6: Word list used for the recordings	409
Appendix 7: A map of the relevant area	414
Appendix 8: Historical development of Wgm. <i>î</i> into two separate phonemes of the Maldegem dialect	415
<b>Samenvatting</b>	<b>416</b>
